

How to increase comprehension using the Preview, Question, and Read method.

Preview

During a preview, DON'T read the entire passage at once! Browse or skim through the passage to get an idea of what it is about before a full read.

Preview is useful for several reasons:

- 1 CREATE familiarity with the material
- 2 GAIN an overview of the material
- 3 INCREASE retention and comprehension

Question

During this phase, reflect on the questions that come to mind as you mentally run through the information you just read.

Reflection allows you to free your mind, focus on one area, and ask some questions about what you are reading.

Read

After using the preview and question methods, your mind is prepared to gather information in the full reading phase. You should be able to speed-read the complete passage and comprehend more.

Download the full, interactive experience both for students & teachers from Nodma at <https://nodma.link/43B> and get **75% off** when you purchase today using the code: **SBSPEEDKID**

Type of Resource:

This is a reference from Nodma e-learning app that may be printed and distributed to students aged 9 and up to provide them with helpful tips on how to increase comprehension. The reference is divided into 3 sections: review, question and read. The actual courseware is an interactive ebook designed for kids who need to improve their reading speed for better school performance.

How to use this Resource:

You may use this resource if you are a teacher who wishes to help your students read more and get more out of reading. Start the discussion by asking them to enumerate the books they love to read. You can then provide them with the printed copy of this reference to read before proceeding to give them some helpful tips on reading and comprehension. After the activity, you may ask them to give their own tips on reading and studying.
